

MEMORANDUM

TO: City Council
FROM: Olivia Goodale, City Administrator

RE: Long Term Solution to City Hall & Public Works Facility

March 11, 2020 Update: A project webpage has been created at https://www.victorcityidaho.com/city_hall/city_projects.php. It may also be found under the City Hall and City Project tabs from the City's homepage. The project page includes a document center with pertinent records such as inspection reports and a status update which will be updated regularly.

February 26, 2020 Update: As part of its FY20 budget, City Council allocated funding to explore a long-term solution to City Hall. Staff is beginning work on the project, specifically exploring the condition of the old city hall located at 32 Elm Street including the cost and feasibility of maintaining administrative offices and the public works shop within the same facility, and related long term considerations and compliance with Title 10 – Land Use requirements. Staff is also forming a draft plan to move through the project which will be presented to Council at a later date and a project page will soon be posted on the City's website.
