

## Minor Site Plan Review

Minor site plans are reviewed and approved administratively by the Planning and Zoning Department located at the City Hall. On average, the minor site plan review takes about 2-6 weeks depending upon the complexity of the project and the completeness and accuracy of the application.

Guidelines to qualify for minor site plan review are:

- New structures and additions under 7,500 sq. ft.
- Any new parking area for less than 25 cars.
- Construction of a temporary parking area or paving of an existing parking area in excess of 1,000 sq. ft.
- Alteration of a drainage area
- Two-family house.
- Change in the use of between 5,000 and 7,500 sq. ft. of an existing building (cumulatively within a 3-year period).
- Building additions up to 7,500 sq. ft. (cumulatively within a 3-year period).

## Major Site Plan Review

Major site plans are reviewed and approved by the Planning and Zoning Board. Planning and Zoning Board workshops and public hearings are held on the first and third Tuesdays of each month. Submissions are required a minimum of two weeks in advance. Once your project has been scheduled for a Planning and Zoning Board workshop, the major site plan review process takes an average of about 6 weeks depending upon the complexity of the project and the completeness and accuracy of the application. A performance guarantee is required. Residents and property owners within 300 feet of the proposed development are notified, and a legal advertisement is placed at the applicant's expense.

Guidelines for major site plan review are:

- New construction over 7,500 sq. ft.
- Parking lot for over 25 cars.
- Building addition over 7,500 sq. ft. (cumulatively within a 3-year period).
- Change of use of over 7,500 sq. ft. (cumulatively within a 3-year period).
- A structure intended for industrial use over 35 ft. high.
- The conversion of a two-family to a three-family house.
- Subdivisions, including multi-family housing.

In order to be sure the City understands the full scope of the project, additional information may be requested prior to the issuance of a permit.

## Site plan exemption application

should be filed for additions less than 500 sq. ft.

## Interior construction & change of use

under 500 sq. ft. does not require a site plan review

Submissions need to include:

- A copy of the floor plan showing dimensions to scale.
- A copy of the construction detail.
- A cover letter explaining the project in detail.

## Steps to Obtain Your Building Permit

### Obtain a general building permit application

General building permit applications can be found on-line at [www.victorcityidaho.com](http://www.victorcityidaho.com) or at Victor City Hall, 32 Elm Street.

### For a major Site Plan Review submit a completed application with 9 sets of a complete site plan

In addition, submit one (1) set of construction drawings which need to include:

- Cross-sections with framing details.
- Detail of any new walls or permanent partitions.
- Floor plans and elevations.
- Window and door schedules.
- Foundation plans with required drainage and damp proofing (if applicable).
- Electrical and plumbing layout.
- Mechanical drawings for any specialized equipment such as furnaces, chimneys, gas equipment, HVAC equipment (air handling) or other types of work that may require special review.
- A copy of the building plan on 11" x 17" paper or a pdf file.

### Obtain separate plumbing, HVAC & electrical permits

Separate permits are required for any internal and external plumbing, HVAC and electrical installations. State law requires an Idaho-licensed master electrician or plumber to perform the work and apply for the necessary permits.

## Pay the required building permit fees

The building permit fee is based on the total construction cost of the project

- Building permit is based off the IBCO Building Valuation Data.
- The minor site plan review fee is \$400.00. The major site plan review fee is \$500.00
- The engineering fees for both minor and major site plans, a service fee deposit of \$300 will be charged to cover the initial review. After the initial review, the applicant will receive a monthly invoice for additional review services rendered.

## Receive a permit

Once you receive approval and all conditions are met, a performance guarantee must be posted for the cost of improvements required in the public right-of-way. You may be required to hold a pre-construction meeting with the Public Works Department and the City Engineer after which time the City will issue a building permit and you may begin construction.

## Complete your project

You must begin construction within six months and continue to work on the project and not have a construction lapse of more than 180 days (six months) to avoid permit expiration. During the construction process you will be required to have periodic inspections which will be outlined by the Inspections Staff in your required pre-construction meeting.

## Obtain your final inspection & then Your Certificate of Occupancy

When your work is complete, you need to call the building Inspector to schedule your final inspection. When all final inspections have been successfully completed, if required, the Building Inspector may issue a Certificate of Occupancy.

## We're Here To Help

Enforcement of the City's building, housing, health and land use codes is important in order to protect the health, safety and welfare of all Victor residents. This brochure is intended to answer commonly-asked questions about requirements for building permits and to help you move through the City's regulatory processes as easily as possible by removing unnecessary confusion, delays and costs. This information is meant to act as a general guide. If you would like more information, please do not hesitate to contact our staff.

### Who Needs a Building Permit?

A building permit is required for anyone seeking to construct, enlarge, alter, repair, move remove, improve, convert, demolish a structure or change its use.

**The permitting process is the best way to ensure quality construction and safe building conditions**

The building permit must be obtained **before** the start of any work and prominently posted at the job site. Submissions for commercial work over \$25,000 must be done by a design professional. Depending on the scale of the project, there are two different types of review.

**Building permit applications and checklists are available on line at [www.victorcityidaho.com](http://www.victorcityidaho.com)**
